

Hello☺) My name is Eka Mamaladze, I'm 21 and I'm From Georgia. I study In Tbilisi State University, Faculty of Law . It's 4th year of my studying.

I think that a person needs to achieve certain goals in one's life before you can call them successful .

Success is to achieve goals, you have set. I have set certain goals I would like to achieve in my lifetime. Some of these goals are personal while others are professional. It is important for me to get satisfied by knowing that I have succeeded myself. And the only way to get it and be successful is to study and work hard!

I try to be active student and be in the environment where I can contribute, learn, and grow as person.

Now I am an intern at " Prince David Institute For Law" , where I do researches about controversial issues, also practice my English since I have to translate decisions of European Court of Human Rights from English into Georgian. I'm trying to be involved in various activities and trainings. One of the memorable projects in my life was the moot court competition in administrative law. We have to defend our position and judge should make decision after our speech. Our team became a winner, I was very happy. thus I coped with the teamwork and after this I took part in other moot court competitions with my team. I also got certificate for my writing about trafficking , which I presented to a big audience. Last Summer I was intern in Ministry Of Justice. I have learnt so much by interacting with other people. I also was a Jury in a moot court. Unforgettable experience! You realize that you have no right to make mistake as other human beings life depends on you! One of those Dilemma Times, when it is so hard to differentiate what is truth and what isn't.

Now what about me.

I'm not particularly adept at expressing myself when it comes matters of a more personal nature, but I will try. My hobby is reading, listening to music, collecting famous quotes and doing researches about inspirational people. I remember when I was still a kid I read Eleanor Roosevelt's words "Remember always that you have not only the right to be an individual. you have an obligation to be one. You cannot make any useful contribution in life unless you do this."

It had such a huge impact on me. Since then I'm trying to do something remarkable. Put some positive and brightness in people 's lives.

Become the change you want to see those are words I live by. The best feeling in world is seeing someone smile and knowing that you are the reason. I strongly believe that we should treat others the same way as we want them to treat us.

Why Enter Your Future?

I applied for this internship because I think that this is an excellent opportunity for building up my professional skills, to increase knowledge, to receive more information and to gain a lot of experiences. People from different cultural backgrounds are likely to have different attitudes towards everything and It's wonderful when you have a lot of different people to learn from, because each person has different experiences and different point of view.

Internships offer experience and a way to see what it's actually like working. It is best way to evaluate what you've already learned and what you need to learn more . It will help me to develop or sharpen my professional skills. I want to improve my leadership skills. As employers are desperate for students who are adaptable, able to be intelligent in the face of change and who leads teams effectively.

They say, Experience is a best teacher and Enter Your Future gives us wonderful opportunity to put our theory into practice and gain practical international experience.

The another reason why I would like to take part in this kind of activity is that I will have a chance to participate in discussing different controversial issues, listen to other people's opinion and then try to argue for the one I stand for, also shape up my standpoint on many globally or locally important issues.
